EDUCATION

Currently enrolled -2027

BACHELOR OF SCIENCE IN SOFTWARE ENGINEERING

GPA: 3.66 / 4.0

2022

FSC - PRE - ENGINEERIG

2020

MATRIC - SCIENCE

SKILLS

- WordPress Development Digital
- Marketing Strategy Canva Design
- Microsoft Office Suite
- n8n Workflow Automation
- AI Tools Development & Integration
- MySQL Database Management
- Problem Diagnosis & Resolution
- Problem Diagnosis
- QA Analyst

LANGUAGES

- English
- Urdu

PROFILE

Dedicated Software Engineering student focusing on AI automation, data management, and workflow optimization. Skilled in content annotation, quality assurance, and automation pipelines to maintain high data consistency and model performance.

WORK EXPERIENCE

Technospire Global Technologies 2026

SocialMedia Handler &WebDeveloper

- Managed social media platforms and created engaging content for advertising campaigns and brand promotion.
- Assisted in website development and maintenance tasks, focusing on front-end adjustments and bug resolution for a smooth user experience.
- Ensured smooth operation of websites by performing regular checks and updates.

WebRabbit Agency 2025

WordPress Development & Automation Intern

- Designed and implemented n8n-based automation workflows to connect various APIs and services, streamlining repetitive business processes.
- Managed client relationships, conducted requirement gathering meetings, and provided technical consultation throughout the project lifecycle.
- Identified, diagnosed, and resolved technical bugs in live WordPress websites to ensure optimal performance and user experience. Customized WordPress themes and plugins to meet specific client specifications and enhance website functionality.

EZITECH INSTITUTE

WordPress Development Intern

- Designed and deployed responsive WordPress websites and e-commerce stores. 2023
- Configured WooCommerce for product listings and payment gateways. Customized themes and developed site functionality using Elementor. Implemented Marketing Strategies Meta Tags, Setup GA4, Facebook Ads.

PROGRAMMMING

- C++
- PYTHON
- JAVA
- HTML
- CSS
- JS
- PHP
- MYSQL

PROJECTS

YOLOv5 and YOLOv8

- Object Detection and Image Captioning Model using Yolov5 and Yolov8

N8N AUTOMATION WORKFLOW

- WhatsAPP AI ChatBot

CERTIFICATIONS

- **WORDPRESS DEVELOPMENT**
  Learning With Earning
- **CANVA DESIGN**

- **WORDPRESS DEVELOPMENT | DIGITAL MARKETING**
  Ezitech Institute
- **WEB DEVELOPMENT | CLIENTS SOLUTIONS**
  WebRabbit Agency
- **WEB DEVELOPER | SOCIAL MEDIA MANAGER**
  Technospire Global Technologies

PROJECTS

AUTOMATED WHATSAPP AI SUPPORT CHATBOT

- Developed an AI-powered WhatsApp chatbot to automate customer support and information sharing. The n8n workflow integrates the Google Gemini Chat Model for intelligent responses. Data retrieval and management are handled through Google Sheets, while a Simple Memory node ensures conversational context. This project successfully streamlines communication and automates query resolution.
- Nodes Applied: Google Gemini, Google Sheets, Memory node .

YOLOV8 - IMAGE & VIDEO OBJECT DETECTION MODEL

- Developed an object detection system using YOLOv8 and Python in VS Code. The model identifies specific objects within images and videos from a custom dataset. Key features include real-time bounding boxes, confidence scores, and AI voice alerts for detections.
- Skills Applied: Python, YOLOv8, OpenCV, pyttsx3, VS Code.

YOLOV5 - REAL-TIME OBJECT DETECTION

- Built a real-time detection system using YOLOv5 on Google Colab. The system processes live webcam feeds, displays bounding box overlays for detected objects, and provides voice output alerts. This project demonstrates real-time computer vision capabilities with user-controlled operation.
- Skills Applied: Python, YOLOv5, OpenCV, Google Colab.
